# 2019 Zucchini/Squash Selection

## BABY BUSH

Striped Baby Bush is a true "baby" zucchini, having full flavor packed in its small attractive zucchini. It is medium dark green with stripes.

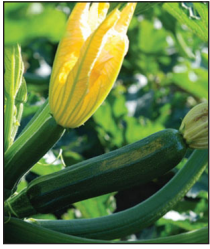

## GREEN MACHINE

Uniform, medium green with light flecking.

## SLICK PIK

Very attractive, spineless and good flavor. Traditional yellow summer squash that has only a slight curve.

## DUNJA

Dark green, straight zucchini - the disease resistance is much better than our favorite variety Raven.

## MAGDA

This "cousa" (Lebanese) type has superb flavor. Magda has a sweet nutty flavor and is blocky, not as slender as Isthar. Paris nicely with Bush Baby variety.

## SPINELESS KING

Medium-dark green zucchini has an upright, open spinells plant which makes it more comfortable for our pickers and helps keep our zucchini scratch free. This is our favorite zucchini flower variety.

## EIGHT BALL

Round, dark green with speckles. Great shape for stuffing or sliced mixed with Geode and Floridor.

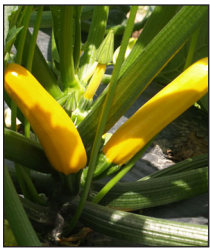

## NOCHE

This "cousa" (Lebanese) type has superb flavor. Noche has a sweet nutty flavor and is blocky, not as slender as Isthar. Paris nicely with Bush Baby variety.

## SUMMER BALL

Bright yellow fruit. A summer treat!

## GOLDEN GLORY

Golden Glory became our favorite Yellow Zucchini. It has a dark yellow color and taste buttery sweet and delicious.

## RAVEN

We love this dark green high yielding zucchini. The darker green skin contains higher levels of lutein, a highly effective antioxidant.

## SUNBURST

Our favorite patty pan, pretty yellow and we can harvest it tiny with the flower attached or teacup size.

## GOLDMINE

Yellow zucchini with attractive white stripes.

## SAFARI

Striped Safari is more cylindrical longer than Baby Bush. The stripes are lighter than Baby Bush. Nicely pairs with Sunbeam.

## ZEPHYR

Unique appearance yellow with faint white stripes and a light green at the blossom end. One of our buyers who has his own garden recommended we grow this. He said it's his favorite summer squash because of its unusually delicious nutty taste and firm texture.

# 2019 Cucumber Selection

## AMERICAN SLICERS

### BRISTOL

Dark green fruit that measure 8" long by 2" in diameter. We are hoping this will become our favorite this year because it has a great disease resistant package that should allow us to harvest longer.

### DIAMOND BACK

We are trialing this cucumber this year and hoping that it will be great tasting because it is suppose to have great yields.

### MARKETMORE 76

Marketmore has been and continues to be our favorite cucumber until we find one that we like better. The Marketmore cucumber is a thick cucumber that's perfect for salads and slicing.

## MINI SNACKING

### AZAMAT

Cocktail sized cucumber is tender, crisp. It has a fabulous firm but juicy texture.

## ASIAN

### STRIPED ARMENIAN

Fantastic flavor - Delicious and different - unusual looking, slightly fuzzy curved fruit with striped ridges. Flesh is mild, sweet and crunchy - excellent slicer and all things cucumber!

### SUYO LONG

We love growing this Chinese cucumber because it's delicious. It's long (up to 15") unusual looking: prickly and crooked, but truly yummy.

### TASTY JADE

Although our Tasty Jade are not usually as straight as this picture! This is a good looking Japanese cucumber, smooth, glossy and straighter than our other Asian cukes.

## PICKLING

### SUPREMO

Supremo became our favorite pickling cucumber mostly because it is gorgeous green and the plant is productive and has a good flavor.
